

AA SCREENING DETERMINATION

Of

Glengarriff Water Treatment Plant Phase 1 and 2 Upgrade Works, Cork

In accordance with Article 6(3) of the EU Habitats Directive (Directive 92/43/EEC) and Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, Irish Water has undertaken Appropriate Assessment screening to assess, in view of best scientific knowledge and the conservation objectives of the site, if the project, individually or in combination with other plans or projects is likely to have a significant effect on European Site(s).

Phase 1 of the Project comprises the installation of a kiosk to house disinfection apparatus in order to address THM exceedances. Phase 2 of the Project involves the installation of filters and pumps, installation of monitoring equipment within the existing kiosk, interconnecting pipework and resurfacing the internal access road. All works will be undertaken within the existing Water Treatment Plant (WTP) site. The WTP is located to the northeast of Glengarriff on a local road ca. 500m north of the N71.

In this context, particular attention was paid to the European Site(s) listed below:

- *Glengarriff Harbour and Woodland SAC (000090)*

In accordance with Regulation 42(7) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, **Irish Water has made a determination following screening that an Appropriate Assessment is not required** as the project is not directly connected with or necessary to the management of the sites as European site(s) and **as it can be excluded**, on the basis of objective information and in light of the conservation objectives of the relevant European Site(s), **that the project, individually or in combination with other plans and projects, would have a significant effect on a European Site.**

This determination is based on the nature, location, scale and duration of the proposed works, including any temporary works and excludes any consideration of mitigation measures.

Full records of the assessment, reports, surveys, consultations, and observations are held by the competent authority and available for public review as requested.
