

AA SCREENING DETERMINATION

Of

Water Network Programme

at

Barndarrig to Redcross, Co. Wicklow

In accordance with Article 6(3) of the EU Habitats Directive (Directive 92/43/EEC) and Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, Irish Water has undertaken Appropriate Assessment screening to assess, in view of best scientific knowledge and the conservation objectives of the site, if the project, individually or in combination with other plans or projects is likely to have a significant effect on European Site(s).

The works include the rehabilitation of approx. 3,080m of watermain between Barndarrig to Redcross with 125mm HDPE and transfer of any existing assets and connections to the new watermain as deemed necessary.

In this context, particular attention was paid to the European Site(s) listed below:

- 000717 Deputy's Pass Nature Reserve SAC
- 000729 Buckroney-Brittas Dunes And Fen SAC
- 000733 Vale of Clara (Rathdrum Wood) SAC

In accordance with Regulation 42(7) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, Irish Water has made a determination following screening that an Appropriate Assessment is not required as the project is not directly connected with or necessary to the management of the sites as European site(s) and as it can be excluded, on the basis of objective information and in light of the conservation objectives of the relevant European Site(s), that the project, individually or in combination with other plans and projects, would have a significant effect on a European Site.

This determination is based on the nature, location, scale and duration of the proposed works, including any temporary works, and excludes any consideration of mitigation measures.

Full records of the assessment, reports, surveys, consultations, and observations are held by the competent authority and available for public review as requested.

Signed:

Al C.

JOHN CASEY
