

Howth Water Supply Scheme

Water Main Upgrade

Irish Water has commenced works to upgrade water mains in Howth to secure the water supply for local business and residents into the future.

Support economic and social development the area

Reducing leakage

Improve security of supply

Irish Water is working in partnership with John Craddock Limited to upgrade the existing aging water mains which supply the Howth area. The project will improve the water supply service to householders and businesses in Howth.

What are the benefits of this project?

- Improved security of water supply.
- Fewer unplanned water interruptions.
- Increased contingency water storage.

What works will be involved as part of this overall project?

- Construction of 6.1 km water mains, from Baldoyle to the existing Reservoir at Dungriffen, Howth.
- Rehabilitation and upgrade works at the existing Corr Bridge Pump Station.
- Construction of a new pump station including chlorine dosing facilities at Dungriffen Reservoir.
